

DeA Capital and its two SGRs donated four equipped modules for Marche's breeders affected by the earthquake

DeA Capital, DeA Capital Alternative Funds and DeA Capital Real Estate donated four equipped modules to support the productive activities and the breeders of Arquata del Tronto (Ascoli Piceno), Visso (Macerata) and Monte San Martino (Macerata), affected by the earthquake in August 2016.

The three companies of the De Agostini Group have thus decided to offer concrete support for the recovery of the local economy in a territory so strongly damaged. In agreement with the Fondazione De Agostini, which already adopted the same project in 2016, the companies funded the project by the NGO GUS–Gruppo Umana Solidarietà, which immediately after the earthquake has started to work in favor of the breeders of the areas that suffered serious damage. The NGO has made available to breeders warehouses, workshops and remittances, with the possibility of using them as "hot and safe" shelters, in case of bad weather or prolonged stay at breeding farms.
